Allowable Subject Matter

1. Claims 1-13 are allowed.

2. The following is an examiner's statement of reasons for allowance:

None of the cited references in combination with other limitations of claim teaches or suggests a method of plurality of display elements, comprising supplying step of supplying the scanning signal to both the certain lines and the other scanning lines, the second step including: supplying a data signal that specifies the gray level to the plurality of data lines corresponding to the display elements included in the certain part of the region, and supplying a non-display signal that specifies a non-display voltage level to the plurality of data lines corresponding to the display elements included in the other part of the region, as disclosed in claim 1. The closest art (Rader and Wani et al.) disclose related methods, either singularly or in combination fail to anticipate or suggest these limitations obvious.

None of the cited references in combination with other limitations of claim teaches or suggests an electronic apparatus, comprising the scanning signals to both the certain scanning lines and the other scanning lines, to make the gray level undisplayed and the data signal that specifies the gray level to the plurality of data lines corresponding to the display elements included in the certain part of the region and including supplying a non-display signal that specifies a non-display voltage level to the plurality of data lines corresponding to the display elements included in the other than the certain part of the region, as disclosed in
